

# SPEZIFIKATION FOR MEDIAPRODUCTION

Article number: SCV-FHD

The FHD Player is a syncable media player for playback of all current video and audio formats. It supports full HD resolution, seamless loop operation and network integration. Additionally, it also features various external control options (e.g. via RS232/UDP) and data management via playlists.

<b>Video formats:</b>	MPEG1, MPEG2, MPEG4, VOB, AVI, JPEG, VCD, DVD, MKV, WMV, DivX, MOV, H264, Program Stream, Elementary Stream, Transport Stream
<b>Audio formats:</b>	WAV, WMA, MP3, OGG, AAC, AC3
<b>Bit rate:</b>	max. 35 MBit/s
<b>Frame rate:</b>	max. 30 fps
<b>Resolution:</b>	max. 1920 x 1080 (full HD), max. 4096 P for JPEG

**i** For an accurate Sync Mode all FHD Player media files must have the same playing time and the media files must contain audio tracks.
