

DECOFRAME AMBIANCE

Ambient **L**ight **R**ejecting Screen

AMBIANCE ALR ADVANTAGES

In an ideal world, you can easily control the lighting situation in your company's conference room, your living room or your beautiful home cinema. Dealing with the effect of ambient light sources can however be a little bit tricky sometimes. To help you enjoy the best image quality possible, our Decoframe Ambiance systems employ advanced surface material technology that uses a black grid structure, which leads to the projector's light being less impacted by ambient light sources and results in a visually stunning projector performance.

THE FRAME PROFILE

DECOFRAME lends an elegant and professional appearance to your home cinema, conference room or any other permanent installation, leaving nothing to be desired.

The frame is delivered with all the individual parts neatly packaged and the rolled up surface material, which guarantees a crease-free projection.

Our unique surface attachment solution with spring hooks ensures homogenous surface tension.

Decoframe projection screens can be made to measure in any aspect ratio.

ALR DAYTIME SETUPS

An ingenious surface structure allows for a highly enjoyable viewing experience, even in situations when ambient light sources might otherwise impact your projector's image quality.

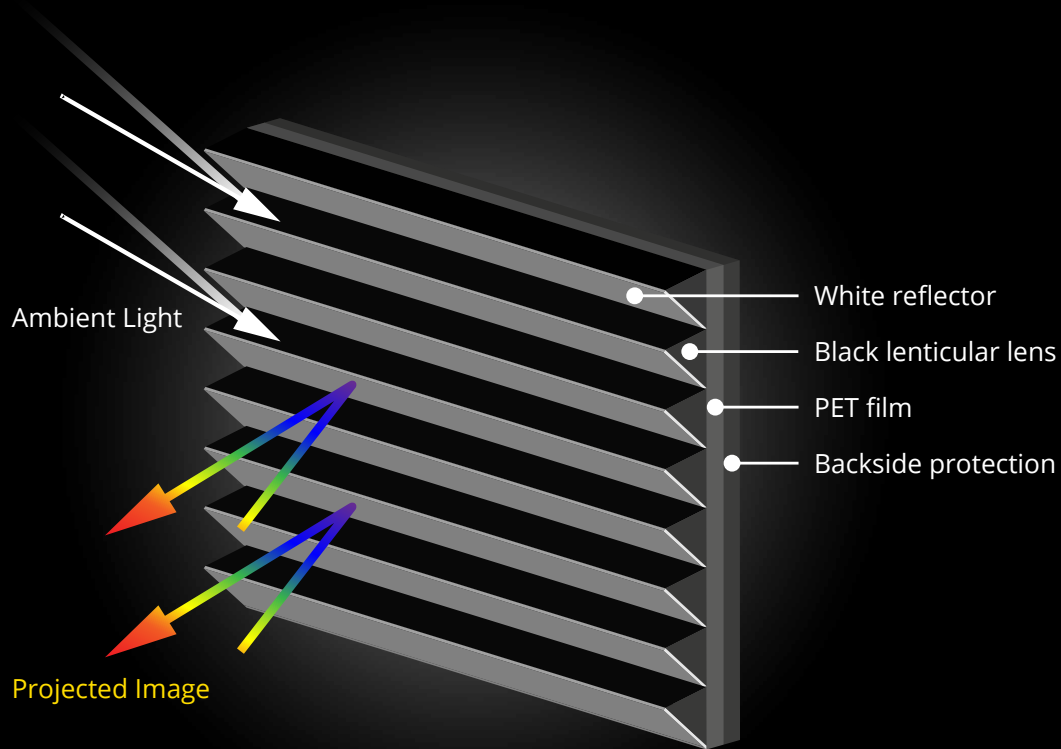

Projection Surface - Ambiance UST

Projection Surface - Ambiance

AMBIANCE UST - LAYER DESIGN

With AMBIANCE UST, you can create the perfect setup for impactful visual experiences when using ultra short throw projectors, where the light source is situated below the screen.

ULTRA WIDE VIEWING ANGLE

With AV Stumpfl Decoframe Ambiance you can enjoy the advantages of an ultra wide viewing angle, which gives you additional spatial flexibility when hosting multiple attendees during an important on-site conference or when inviting friends over to watch e.g. an important sports event together.

EYE FRIENDLY

The diffuse reflection properties of the AMBIANCE screen system leads to your eyes not getting tired that easily when watching the screen for extended periods of time. Using this innovative system, you can enjoy watching episodes of your favourite series even longer, or stay more alert during important conference calls and presentations.
